PUBLISHED BY FIELD MUSEUM OF NATURAL HISTORY

Information for Contributors to *Fieldiana*

General: *Fieldiana* is primarily a journal for Field Museum staff members and research associates, although manuscripts from nonaffiliated authors may be considered as space permits.

The Journal carries a page charge of \$65.00 per printed page or fraction thereof. Payment of at least 50% of page charges qualifies a paper for expedited processing, which reduces the publication time. Contributions from staff, research associates, and invited authors will be considered for publication regardless of ability to pay page charges, however, the full charge is mandatory for nonaffiliated authors of unsolicited manuscripts. Three complete copies of the text (including title page and abstract) and of the illustrations should be submitted (one original copy plus two review copies which may be machine-copies). No manuscripts will be considered for publication or submitted to reviewers before all materials are complete and in the hands of the Scientific Editor.

Manuscripts should be submitted to Scientific Editor, *Fieldiana*, Field Museum of Natural History, Chicago, Illinois 60605-2496, USA.

Text: Manuscripts must be typewritten double-spaced on standard-weight, 8½- by 11-inch paper with wide margins on all four sides. If typed on an IBM-compatible computer using MS-DOS, also submit text on 5¼-inch diskette (WordPerfect 4.1, 4.2, or 5.0, MultiMate, Displaywrite 2, 3 & 4, Wang PC, Samna, Microsoft Word, Volkswriter, or WordStar programs or ASCII).

For papers over 100 manuscript pages, authors are requested to submit a "Table of Contents," a "List of Illustrations," and a "List of Tables" immediately following title page. In most cases, the text should be preceded by an "Abstract" and should conclude with "Acknowledgments" (if any) and "Literature Cited."

All measurements should be in the metric system (periods are not used after abbreviated measurements). The format and style of headings should follow that of recent issues of *Fieldiana*.

For more detailed style information, see *The Chicago Manual of Style* (13th ed.), published by The University of Chicago Press, and also recent issues of *Fieldiana*.

References: In "Literature Cited," book and journal titles should be given in full. Where abbreviations are desirable (e.g., in citation of synonymies), authors consistently should follow *Botanico-Periodicum-Huntianum* and *TL-2 Taxonomic Literature* by F. A. Stafleu & R. S. Cowan (1976 *et seq.*) (botanical papers) or *Serial Sources for the Biosis Data Base* (1983) published by the BioSciences Information Service. Names of botanical authors should follow the "Draft Index of Author Abbreviations, Royal Botanic Gardens, Kew," 1984 edition, or *TL-2*.

References should be typed in the following form:

Croat, T. B. 1978. Flora of Barro Colorado Island. Stanford University Press, Stanford, Calif., 943 pp.

Grubb, P. J., J. R. Lloyd, and T. D. Pennington. 1963. A comparison of montane and lowland rain forest in Ecuador. I. The forest structure, physiognomy, and floristics. *Journal of Ecology*, 51: 567-601.

Langdon, E. J. M. 1979. Yage among the Siona: Cultural patterns in visions, pp. 63-80. In Browman, D. L., and R. A. Schwarz, eds., *Spirits, Shamans, and Stars*. Mouton Publishers, The Hague, Netherlands.

Murra, J. 1946. The historic tribes of Ecuador, pp. 785-821. In Steward, J. H., ed., *Handbook of South American Indians*. Vol. 2, *The Andean Civilizations*. Bulletin 143, Bureau of American Ethnology, Smithsonian Institution, Washington, D.C.

Stolze, R. G. 1981. Ferns and fern allies of Guatemala. Part II. Polypodiaceae. *Fieldiana: Botany*, n.s., 6: 1-522.

Illustrations: Illustrations are referred to as "figures" in the text (not as "plates"). Figures must be accompanied by some indication of scale, normally a reference bar. Statements in figure captions alone, such as "× 0.8," are not acceptable. Captions should be typed double-spaced and consecutively. See recent issues of *Fieldiana* for details of style.

All illustrations should be marked on the reverse with author's name, figure number(s), and "top."

Figures as submitted should, whenever practicable, be 8½ × 11 inches (22 × 28 cm), and may not exceed 11½ × 16½ inches (30 × 42 cm). Illustrations should be mounted on boards in the arrangement to be obtained in the printed work. This original set should be suitable for transmission to the printer as follows: Pen and ink drawings may be originals (preferred) or photostats; shaded drawings must be originals, but within the size limitation; and photostats must be high-quality, glossy, black-and-white prints. Original illustrations will be returned to the corresponding author upon publication unless otherwise specified.

Authors who wish to publish figures that require costly special paper or color reproduction must make prior arrangements with the Scientific Editor.

Page Proofs: *Fieldiana* employs a two-step correction system. The corresponding author will normally receive a copy of the edited manuscript on which deletions, additions, and changes can be made and queries answered. Only one set of page proofs will be sent. All desired corrections of type must be made on the single set of page proofs. Changes in page proofs (as opposed to corrections) are very expensive. Author-generated changes in page proofs can only be made if the author agrees in advance to pay for them.

Catalog of Type, Figured, and Referred Mazon Creek Fossils in Private Collections

Abstract

Fossil-bearing concretions found in the Francis Creek Shale of the Carbondale Formation near Mazon Creek, Illinois, have attracted international attention. The abundant and diverse biota of this Pennsylvanian delta complex has been studied for almost 150 years, resulting in many taxonomic descriptions. Numerous Mazon Creek fossils in private collections have been designated as type, figured, or referred specimens. The locations of privately owned specimens are less permanent than those of institutional collections.

A review of 93 scientific articles on Mazon Creek fossils published between 1844 and 1987 indicates that 426 specimens belong to 69 private collectors. Because published (type, figured, and referred) specimens form the foundation of paleontology, knowing the current locations of these specimens is important. This paper, based on contacts with most of the 69 private collectors, provides current information on locations of their collections.

Introduction

Fossil-bearing concretions (nodules) are found in the Francis Creek Shale of the Carbondale Formation of Illinois. Fossils in these concretions are termed "Mazon Creek fossils" because they were first collected along the banks of Mazon Creek in Grundy County in northeastern Illinois. Similar concretions were later found in other parts of Grundy County, as well as in Will and Kankakee counties. These fossils have drawn international attention for more than a century. The abundant and diverse biota of this Pennsylvanian delta com-

plex along the northern coast of the Illinois Basin was first studied by Agassiz (1844); Nitecki (1979) provides a history of subsequent collecting and research. A total of 96 "natural" floral species (Pfefferkorn, 1979) and 325 faunal species (S. R. Sroka, pers. comm., 1987) are estimated to occur in this area.

Private collectors have always played an important role in fossil study by recovering concretions and sharing their finds with paleontologists. Researchers have designated privately owned Mazon Creek fossils, like fossil specimens in institutions, as type, figured, or referred specimens. Consequently, published Mazon Creek fossils are housed in museums, universities, and private collections.

The International Codes of Botanical and Zoological Nomenclature recommend that all type specimens be preserved in permanent institutions. Article 72 of the International Code of Zoological Nomenclature (Ride et al., 1985, p. 147) states that name-bearing types are to be "held in trust for science by all zoologists and by persons responsible for their safe keeping." Furthermore, Recommendation 72D gives the responsibilities for preserving type specimens to museums or similar institutions. The International Code of Botanical Nomenclature (Voss et al., 1983, p. 9) states in Recommendation 7A: "It is strongly recommended that the material on which the name of a taxon is based, especially the holotype, be deposited in a permanent, responsible institution and that it be scrupulously conserved." Paleontologists have not always followed the recommendations of the International Codes; scientists studying Mazon Creek taxa are no exception. The fact that there

are no recommendations for the maintenance of figured and referred specimens contributes further to the problem.

The purpose of this paper is to compile a list of the current location of all published Mazon Creek fossils cited as belonging to private collectors. In a review of approximately 450 articles on Mazon Creek fossils published between 1844 and 1987, I found that 93 articles cited 426 specimens as belonging to 69 private collectors. Knowing the current location of all published specimens, especially types, is intrinsic to the science of paleontology. Since figured and referred specimens may be as essential as type specimens, they also are included in this catalog.

I attempted to contact all of the private collectors in writing, using addresses obtained from Field Museum of Natural History, Northeastern Illinois University, or other collectors. A few collectors chose not to respond or could not be located. I sent as many as four letters to individuals who failed to respond. I also asked collectors for their assistance in finding other collectors I could not locate. Of the 69 cited private collectors, 51 were located, seven could not be located, and 11 are deceased. Of the 51 who were located, 47 confirmed their holdings or indicated the current whereabouts of each specimen, and seven chose not to respond. Subsequent to publication, some specimens have changed ownership. Therefore, in addition to the 69 private collectors cited, eight additional private collectors (three of whom wish to remain anonymous and five of whom verified their holdings) and 11 institutions have become owners. Of the private collections of the 11 deceased owners, nine were located.

The list of private collectors in this catalog does not include all of the individuals who have contributed specimens for scientific study. Also, this catalog does not list all privately owned specimens that were studied by researchers. Because many collectors donated their specimens to museums before the research was published, these specimen locations are recorded in museum collections. Only those specimens actually cited in publications as belonging in private collections are listed herein.

Of the 426 specimens cited as privately owned and listed in this catalog, 165 now belong to museums, 244 are known or thought to be in private collections, and 17 are known to be lost. Three specimens were incorrectly cited in publications as museum specimens when, in fact, they are privately owned. Of the privately owned Mazon Creek type specimens listed in this catalog, there are 38

holotypes, 18 paratypes, 7 syntypes, 1 lectotype, and 1 paralectotype. Of the 38 holotypes originally cited as privately owned, 20 are known to be in museums, 15 are known or thought to be in private collections, and three are known to be lost.

Given varying amounts of time, a private collection often ends up via gift or sale in a museum or university. Only under such stabilized housing can one expect to find important specimens in the future. Private collectors were asked whether they had plans for their published fossils: 10 replied no and 16 replied yes. Of the 16 affirmative responses, two planned to give their fossils to a relative; 10 planned to donate their fossils to a museum, university, or state geological survey; and four planned to sell their fossils. The collections of those private owners who were not located or who chose not to respond to this catalog should be considered officially lost.

Some of the early students of the Mazon Creek biota made their own collections. I chose not to list the collections of deceased professional paleontologists (Langford, Gurley, Scudder, and Worthen) who subsequently contributed their privately owned specimens to their respective institutions. Thus, the Langford collection is at ISM and FMNH; Gurley collection is at FMNH (UC) and USNM (Lacoe collection); Scudder collection is at MCZ and USNM; and Worthen collection is at at least four institutions: USNM, UMMP, UI-Urbana (see Hansman & Scott, 1967), and ISGS (see Kent, 1982).

The catalog is arranged alphabetically by the collector's last name, followed by status of collection, collector's address, new collector/collection (indicated by "[]"), and new address, if applicable. Within a private collection, specimens are listed alphabetically by genus and species, then numerically. Collectors who responded chose how they would like their name, or name with address, listed. Addresses for those collectors who did not want their addresses listed herein are available through the author. For those collectors who chose not to respond, the status of their fossils could not be confirmed.

Each cited specimen is accompanied by the following information: name as published; author and year of publication (I did not cite all editions of books and articles; however, in all cases, an effort was made to cite the first edition); designation (type, figured, or referred specimen); private collector's specimen number and/or current catalog number (separated by "→" when changed from one to the other); citation, including author, year, page of description or reference, illustrations, and

measurement tables; specific locality information; remarks; and subsequent species assignment and citation. The format is as follows:

COLLECTOR [Status]
Address
City, state, zip
↓
NEW COLLECTOR/COLLECTION

Genus species Author, year
Designation: number → subsequent information
Citation
Locality
Remarks
= Genus species
Designation
Citation
Remarks

The geologic horizon (the same for all specimens) is Pennsylvanian, Westphalian D, Carbondale Formation, Francis Creek Shale. The locality generally is Will, Grundy, or Kankakee counties, Illinois, U.S.A. Pit 11 (near Braidwood, Illinois), the most common locality listed in the catalog, is a large area of spoil heaps once mined by the Peabody Coal Company and now owned by Commonwealth Edison.

***Hadentomum americanum* Handlirsch, 1906**

Cotype: unnumbered (obverse half → UMMP
7211; reverse half → USNM 35579)

Handlirsch, 1906a: p. 693, text-figs. 19–21

Near Morris, Illinois.

Holotype

Carpenter, 1965: p. 186, text-fig. 6

***Heterotarbus ovatus* Petrunkevitch, 1913**

Holotype: unnumbered → UMMP 7217

Petrunkevitch, 1913: p. 115, text-fig. 70, pl.
10, fig. 59

Mazon Creek, Illinois.

Holotype

Petrunkevitch, 1949: p. 178, no figs.

Holotype

Petrunkevitch, 1953: p. 49, no figs.

***Kustarachne conica* Petrunkevitch, 1913**

Holotype: unnumbered → UMMP 7221

Petrunkevitch, 1913: p. 72, pl. 6, fig. 35, text-
fig. 36

Mazon Creek, Illinois.

- Holotype
Petrunkévitch, 1949: p. 268, no figs.
Ventral half only.
- Myliacris similis** Handlirsch, 1906
Holotype: unnumbered (obverse half → UMMP 7207; reverse half → USNM 35573)
Handlirsch, 1906: p. 779, text-fig. 88, meas.
Mazon Creek, Illinois, near Morris, Illinois.
- Palaeocarrion ornata** Cockerell, 1917
Holotype: unnumbered (part = missing; counterpart → USNM 65024)
Cockerell, 1917: p. 80, text-figs. 2–3
Mazon Creek, Illinois.
Discovered by J. C. Carr.
- Poliochera punctulata** Scudder, 1884
= *Polyochera punctulata* Scudder, 1884
Referred specimen: unnumbered → UMMP 7223
Petrunkévitch, 1913: p. 80, no figs.
Mazon Creek, Illinois.
Referred specimen
Petrunkévitch, 1949: p. 286, no figs.
Referred specimen
Petrunkévitch, 1953: p. 112, no figs.
- Protophryne carbonarius** Petrunkévitch, 1913
Holotype: unnumbered → UMMP 7222
Petrunkévitch, 1913: p. 69, text-figs. 32–33, pl. 6, figs. 30–31
Mazon Creek, Illinois.
Holotype
Petrunkévitch, 1949: p. 273, no figs.
Holotype
Petrunkévitch, 1953: p. 100, no figs.
Obverse and reverse halves.
- Sagenodus occidentalis** (Newberry & Worthen, 1866)
Referred specimens: 12–13 → missing
Hay, 1900: p. 101, meas., no figs.
No locality information.
- Sagenodus quadratus** (Newberry, 1873)
Referred specimens: 8–9; 19 → missing
Hay, 1900: p. 103, meas., no figs.
No locality information.
- Sagenodus quincunciatus** Cope, 1897
Referred specimens: 10–11, 20–21 → missing
Hay, 1900: p. 109, no figs.
Mazon Creek, Illinois.
- Thelyphryne elongatus** Petrunkévitch, 1913
Holotype: unnumbered → UMMP 7220
Petrunkévitch, 1913: p. 66, pl. 5, fig. 26, text-figs. 27–28, meas.
Mazon Creek, Illinois.
Holotype
Petrunkévitch, 1949: p. 273, no figs.
Dorsal only.
- Trigonomartus pustulatus** (Scudder, 1884)
Figured specimen: unnumbered → UMMP 7218
Petrunkévitch, 1913: p. 102, text-figs. 60–61, pl. 9, figs. 49–50
Mazon Creek, Illinois.
Referred specimen
Petrunkévitch, 1949: p. 257, no figs.
Referred specimen
Petrunkévitch, 1953: p. 90, no figs.
- Trigonoscorpion americanus** Petrunkévitch, 1913
Holotype: unnumbered → UMMP 7224 (cast = YPM 139)
Petrunkévitch, 1913: p. 47, text-fig. 10, pl. 4, figs. 17–18
Mazon Creek, Illinois.
Holotype
Petrunkévitch, 1953: p. 31, no figs.
= *Eoscorpion carbonarius* Meek & Worthen, 1868
Figured specimen
Kjellesvig-Waering, 1986: p. 163, text-fig. 74
Both halves.
- DAVENPORT, KENNETH** [unable to locate]
Belotelson magister (Packard, 1886)
Figured specimen: D 8127
Schram, 1974b: p. 33, text-figs. 22, 24–25
No locality information.
- Belotelson magister** (Packard, 1886)
Figured specimen: D 8201
Schram, 1974b: p. 33, text-fig. 28
No locality information.
- DOUGLASS, DAVID** [confirmed]
704 Main St.
Evanston, IL 60202
- Conchopoma edesi** Denison, 1969
Referred specimen: 517
Schultze, 1975: p. 214, no figs.
Pit 11.
- Gerarus vetus** Scudder, 1885
Figured specimen: 1
Burnham, 1983: p. 14, text-fig. 4 (composite)
Mazon Creek, Illinois.
Obverse and reverse halves.

- Gilpichthys greenei** Bardack & Richardson, 1977
 Referred specimen: unnumbered
 Bardack & Richardson, 1977: p. 497, no figs.
 Pit 11.
 Part and counterpart.
- Jeletzkyia douglassae** Johnson & Richardson, 1968
 Holotype: 565
 Johnson & Richardson, 1968: p. 526, text-figs. 1–4, meas.
 Pit 11.
 Holotype
 Saunders & Richardson, 1979: p. 351, text-fig. 8
 Both halves.
- Mischoptera douglassi** Carpenter & Richardson, 1968
 Holotype: 39
 Carpenter & Richardson, 1968: p. 301, text-fig. 2, pls. 24, 25, 27
 Pit 6 of the Northern Illinois Coal Company, near the Grundy-Will county line, Illinois.
 Obverse and reverse halves.
- Pipiscius zangerli** Bardack & Richardson, 1977
 Figured specimen: 604
 Bardack & Richardson, 1977: p. 492, text-fig. 2
 Pit 11, Peabody Coal Company, Will and Kankakee counties, Illinois.
 Part and counterpart.
- Titanoscorpio douglassi** Kjellesvig-Waering, 1986
 Holotype: 1
 Kjellesvig-Waering, 1986: p. 240, text-fig. 108F–G
 Mazon Creek area, Illinois.
 Collected 1966; three parts of a concretion.
- Titanoscorpio douglassi** Kjellesvig-Waering, 1986
 Paratype: 3
 Kjellesvig-Waering, 1986: p. 240, text-figs. 108A–E
 No locality information.
- EVEN, JOSEPH** [deceased]
 Morris, Illinois
- Acanthotelson eveni** Meek & Worthen, 1868a
 Syntype: unnumbered → ISGS (ISM) 3066
 Meek & Worthen, 1868a: p. 28, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 551, text-figs. A–C
 = *Acanthotelson stimpsoni* Meek & Worthen, 1865
 Syntype
 Schram, 1984: p. 205, no figs.
 Reverse half only.
- Acanthotelson eveni** Meek & Worthen, 1868a
 Syntype: unnumbered → UI-X-344 = ISM 11108
 Meek & Worthen, 1868a: p. 28, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 551, text-figs. B–D (composite)
 = *Acanthotelson stimpsoni* Meek & Worthen, 1865
 Paralectotype
 Schram, 1984: p. 205, no figs.
 Part and counterpart.
- Acanthotelson eveni** Meek & Worthen, 1868a
 Syntype: unnumbered → UI-X-346 = ISM 11118
 Meek & Worthen, 1868a: p. 28, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 551, text-figs. B–D (composites)
 = *Acanthotelson stimpsoni* Meek & Worthen, 1865
 Lectotype
 Schram, 1984: p. 205, no figs.
- Amphibamus grandiceps** Cope, 1865
 Holotype: unnumbered → destroyed (lost in home fire, as reported by Moodie, 1916: p. 126)
 Cope, 1865: p. 134, no figs.
 Near Morris, Grundy County, Illinois.
 Holotype
 Cope, 1866: text-fig. on p. 136 (woodcut); pl. 32, fig. 8
 Holotype
 Moodie, 1909: p. 82, text-fig. 24 (restoration)
 Holotype
 Moodie, 1916: p. 126, pl. 3, fig. 7
- Anthrapalaemon gracilis** Meek & Worthen, 1865
 Referred specimen: unnumbered → UI-X-343 = ISM 11124
 Meek & Worthen, 1865: p. 50, meas., no figs.
 South side of Illinois River, at Morris, Grundy County, Illinois.
 Meek & Worthen, 1866: p. 406, pl. 32, fig. 4 (composite)
 = *Anthracaris gracilis* (Meek & Worthen, 1865)
 Referred specimen (although designated as “type” by Meek & Worthen, so was ISM 3067, which is the holotype; see Brooks, 1962)
 Brooks, 1962: p. 174, no figs.

- Euphoberia armigera** Meek & Worthen, 1868a
 Syntype: unnumbered → ISGS (ISM) 2910
 Meek & Worthen, 1868a: p. 26, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 556, text-figs. A–B
- Euphoberia armigera** Meek & Worthen, 1868a
 Syntype: unnumbered → UI-X-497 = ISM 11106
 Meek & Worthen, 1868a: p. 26, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 556, text-fig. C
 One-half only.
- Euphoberia armigera** Meek & Worthen, 1868a
 Syntype: unnumbered → UC 19703 = FMNH UC 19703
 Meek & Worthen, 1868a: p. 26, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 556, text-fig. D
- Euphoberia? major** Meek & Worthen, 1868a
 Syntype: unnumbered → UI-X-504 = ISM 11120
 Meek & Worthen, 1868a: p. 26, no figs.
 Mazon Creek, Grundy County, Illinois.
 Syntype
 Meek & Worthen, 1868b: p. 558, text-fig. on p. 558
 = *Acantherpestes major* (Meek & Worthen)
 One-half only.
- Eurypterus (Anthraconectes) mazonensis** Meek & Worthen, 1868a
 Holotype: unnumbered → AMNH 8538
 Meek & Worthen, 1868a: p. 19, no figs.
 Mazon Creek, Grundy County, Illinois.
 Holotype
 Meek & Worthen, 1868b: p. 544, text-figs. on p. 544
 Holotype
 Clarke & Ruedemann, 1912: p. 226, text-figs. 50–51, meas., pl. 26, fig. 1
 = *Lepidoderma mazonense* (Meek & Worthen, 1868)
 Holotype
 Kjellesvig-Waering, 1948: p. 17, no figs.
 = *Adelophthalmus mazonensis* (Meek & Worthen, 1868)
 Holotype (label at AMNH has James Hall Collection)
 Kjellesvig-Waering, 1963: p. 86, no figs.
 One-half only.
- FAGAN, J. J.** [confirmed]
 10001 S. Pulaski Rd.
 Chicago, IL 60642
- Prochoroptera calopteryx** Handlirsch, 1911
 Figured specimen: JJF-IL11-007 → FMNH PE 25667
 Carpenter & Richardson, 1978: p. 222, text-fig. 2 (composite), meas.
 Pit 11.
- GEORGE, CALVIN** [confirmed]
 1824 Harvest Lane
 Glendale Heights, IL 60139
- Essoidia epiceron** Schram, 1974b
 Referred specimen: G 061-113
 Schram, 1974b: p. 49, no figs.
 Pit 11.
- Hesslerella shermani** Schram, 1970
 Referred specimen: CG 11-244
 Schram, 1974a: p. 98, no figs.
 Pit 11.
- Tullimonstrum gregarium** Richardson, 1966a
 Figured specimen: S-11-120
 Johnson & Richardson, 1970: p. 54, pl. 4, fig. A
 Pit 11.
 Figured specimen
 Case, 1982: p. 183, text-fig. 19-4
 Mazon Creek area, Illinois.
- GREENE, FRANK, JR.** [deceased]
 190 W. 3rd St.
 Coal City, IL 60416
 ↓
MRS. FRANK GREENE, JR. [confirmed]
 Address as above
- Anthracomedusa turnbulli** Johnson & Richardson, 1968
 Hypotype: unnumbered
 Foster, 1979: p. 226, text-fig. 7A
 Pit 11.
 Both halves.
- Essexella asherae** Foster, 1979
 Paratype: unnumbered → FMNH PE 39892
 Foster, 1979: p. 244, text-fig. 18B
 Pit 11.
 Both halves.
- Eucaenus ovalis** Scudder, 1885
 Figured specimen: G75 (both halves) → DENNIS KINGERY PRIVATE COLLECTION, 110 Grant, Rock Springs, WY 82901 [confirmed]

- Carpenter & Richardson, 1976: p. 231, text-figs. 1 (composite), 3–4
Pit 11.
Both halves.
- Strobeus sp. on *Essexella asherae*** Foster, 1979
Paratype: unnumbered → FMNH PE 39893
Foster, 1979: p. 207, text-fig. 2A
Pit 11.
Both halves.
- Strobeus sp. on *Essexella asherae*** Foster, 1979
Paratype: unnumbered
Foster, 1979: p. 207, text-fig. 2B
Pit 11.
Both halves.

ROBERT COOPER PRIVATE COLLECTION

Anthracocephalus ingelsorum Schram, 1976

Holotype: CEI 41130
Schram, 1976: p. 24, text-figs. 2–3
Sunspot Mine, just north of Astoria, Fulton County, Illinois.
Both halves: to be deposited as FMNH P 32085.

Drevotella proteana Nitecki & Richardson, 1972

Figured specimen: unnumbered
Nitecki & Richardson, 1972: p. 2, text-fig. 2b
No locality information.

Drevotella proteana Nitecki & Richardson, 1972

Figured specimen: unnumbered
Nitecki & Richardson, 1972: p. 2, text-fig. 2c
No locality information.

JOHNSON, A. [unable to locate]

Esconichthys apopyris Bardack, 197

Figured specimen: unnumbered
Bardack, 1974: p. 990, pl. 1, fig. 4
Pit 11 or Sun Spot Mine.

KIMBALL, ARTHUR [unable to locate]

Pipiscius zangerli Bardack & Richardson, 1977

Referred specimen: unnumbered
Bardack & Richardson, 1977: p. 492, no figs.
Pit 11 of the Peabody Coal Company in Will and Kankakee counties.
Part & counterpart.

KNOWLTON, LOUIS [unable to locate]

Geralinura gigantea Petrunkevitch, 1913

Figured specimen: unnumbered
Langford, 1963: p. 39, text-fig. 58
No locality information.
Matching halves of a concretion.

KOLODZYK, MICHAEL J. [confirmed]

Milwaukee Area Technical College
Biology Dept.
1015 N. 6th St.
Milwaukee, WI 53203

"Elonichthys" peltigerus Newberry, 1856

Referred specimen: MK1312
Schultze & Bardack, 1987: p. 7, no figs.
Pit 11.

KONECNY, JAMES E., AND SYLVIA [confirmed]

3036 Geronimo Rd.
Prescott, AZ 86301

Belotelson magister (Packard, 1886)

Referred specimen: K11-0133

- Schram, 1974b: p. 33, no figs.
Pit 11.
- Conchopoma edesi** Denison, 1969
Referred specimen: K11-0394
Schultze, 1975: p. 214, no figs.
Pit 11 (collected July 11, 1970).
Incorrectly cited as K7-11-70.
- Essoidia epiceron** Schram, 1974b
Figured specimen: K11-0134
Schram, 1974b: p. 46, text-fig. 35
Pit 11.
- Fossundecima konecniorum** Thompson, 1979
Figured specimen: K11-0708
Thompson, 1979: p. 188, pl. 6, fig. 5
Pit 11 strip mine in northern Illinois.
- Jeletzkyia douglassae** Johnson & Richardson, 1968
Referred specimens: K11-0369, K11-1143
Saunders & Richardson, 1979: p. 351, no figs.
Pit 11 of the Peabody Coal Company.
- Kellibrooksia macrogaster** Schram, 1973a
Figured specimen: K11-0009
Schram, 1973a: p. 80, text-fig. 2
Pit 11.
- Kellibrooksia macrogaster** Schram, 1973a
Referred specimen: K11-0017
Schram, 1973a: p. 82, no figs.
Pit 11.
- Kellibrooksia macrogaster** Schram, 1973a
Figured specimen: K11-0041
Schram, 1973a: p. 80, text-figs. 3, 4B
Pit 11.
- Kellibrooksia macrogaster** Schram, 1973a
Figured specimen: K11-0045 → George Lee, Jr.,
Private Collection, 330 Paularino Ave.,
Costa Mesa, CA 92626 [confirmed]
Schram, 1973a: p. 80, text-fig. 5
Pit 11.
- Latzelia primordialis** Scudder, 1890
Referred specimen: K11-0427
Mundel, 1979: p. 366, no figs.
Pit 11.
Incorrectly cited as FMNH PE 29005.
- Myeterops** sp.
Figured specimen: K11-0338 (part and counterpart)
Kjellesvig-Waering, 1963: p. 104, text-fig. 56
Strip mines on the Will-Grundy County line
(old Greer School locality).
- Rhaphidiophorus hystrix** Thompson, 1979
Figured specimen: K11-0612
Thompson, 1979: p. 190, pl. 6, fig. 7
Pit 11.
- Tullimonstrum gregarium** Richardson, 1966a
Referred specimen: K11-0001
Johnson & Richardson, 1969: p. 129, no figs.
Pit 11.
- KOTT, A. W.** [deceased]
|
ROBERT KOTT [confirmed]
5410 S. 73 Ave.
Summit, IL 60501

Referred specimen: PB 528
Schultze, 1974: p. 31, no figs.
Pit 11.
- Tullimonstrum gregarium** Richardson, 1966a
Referred specimen: PB 1311
Richardson, 1966a: p. 76, no figs.
Pit 11.
- LASCO, LEONARD** [confirmed]
1525 W. Smith
Peoria, IL 61605
- Lascoa mesostaurata** Foster, 1979
Holotype: unnumbered
Foster, 1979: p. 233, text-figs. 11-12
Astoria, Illinois.
Positive and negative sides of a concretion.
- LEMAY, STEPHEN** [confirmed]
R.R. 1, Box 33
Tonica, IL 61370
- Bivalve**
Figured specimen: SLM 100
Shabica, 1978: p. 558, text-fig. 5E
Pit 11.
- Cephalopod**
Referred specimen: SLM 8
Richardson & Johnson, 1971: p. 1222, no figs.
Pit 3 off Road 159
Collected Feb. 13, 1965.
- Cryptocaris hootchi** Schram, 1974a
Figured specimen: SLM 6
Schram, 1974a: p. 100, text-fig. 9, meas. in
tbl. 1
Peabody Coal Company, pit 11.
- Jeletzkyia** sp.
Referred specimen: SLM 1066

- Saunders & Richardson, 1979: p. 351, no figs.
SE 1/4, SE 1/4, NE 1/4, sec. 32, T32N, R9E,
pit 11.
Collected May 4, 1975.
- Megalichthys sp.**
Referred specimen: SLM 195
Schultze, 1974: p. 31, no figs.
SE 1/4, SW 1/4, SW 1/4, sec. 32, T32N,
R9E, pit 11.
Collected May 27, 1967.
- Scallop**
Figured specimen: SLM 9
Richardson, 1968: text-fig. on p. 8
SE 1/4, SW 1/4, SW 1/4, sec. 32, T32N,
R9E, pit 11.
Collected May 27, 1967.
- Stearoceras sp.**
Referred specimens: SLM 11, 1272–1273
Saunders & Richardson, 1979: p. 359, no figs.
Pit 11.
SLM 11 collected May 27, 1967; SLM 1272 and
1273 collected March 20, 1976.
- LIETZ, WALTER H., AND RITA M.** [confirmed]
Wilmington, Illinois
- “Elonichthys” hypsilepis** Hay 1900
Referred specimens: L-1611, L-1611D
Schultze & Bardack, 1987: p. 8, no figs.
Pit 11.
L-1611 collected Sept. 11, 1976; L-1611D col-
lected April 9, 1982.
- “Elonichthys” peltigerus** Newberry, 1856
Referred specimen: L-1611B
Schultze & Bardack, 1987: p. 7, no figs.
Pit 11.
Collected Aug. 9, 1978.
- Monura sp.**
Referred specimen: L-1658
Kukalova-Peck, 1985: p. 944, no figs.
North of Road N-500-W on Tipple Hill,
located between the towns of Essex and
South Wilmington, Illinois.
Collected Oct. 8, 1976.
- Trigonomartus sp.**
Figured specimen: L-1600
Baird et al., 1985: p. 262, text-fig. 5.4
Bear Lake, Illinois (Goldblatt’s area), lo-
cated ½ mile north of pit 1 (Miner’s Club)
on access road north of intersection of I-
55 and Route 113.
Collected May 20, 1975.
- MAKOWSKI, JOSEPH** [confirmed]
6136 W. Henderson St.
Chicago, IL 60634
- Oligotypus makowskii** Carpenter & Richardson,
1971
Holotype: IWJM-I-C
Carpenter & Richardson, 1971: p. 286, text-
fig. 14, meas.
Pit 11.

- Arthropleura sp.**
Figured specimen: 5000-1.1
Richardson, 1956c: p. 72, text-fig. 39 (de-
tailed map of locality given in text-fig. 3)
Will County, Illinois.
Collected 1953.
= *Arthropleura cristata* Richardson, 1959
Referred specimen
Richardson, 1959: p. 82, no figs.
Figured specimen
Langford, 1963: p. 19, text-fig. 24
Matching halves of a concretion.
- Aviculopecten mazonensis** Worthen, 1890
Figured specimen: 100-1.1
Richardson, 1956b: p. 65, text-fig. 37
Underground mine dump at Diamond.
Figured specimen
Langford, 1963: p. 14, text-fig. 12
Both halves of a concretion.
- Curculioides gracilis** Petrunkevitch, 1945
Figured specimen: 500-1.1
Langford, 1963: p. 65, text-figs. 104–105
No locality information.
- “Elonichthys” hypsilepis** Hay, 1900
Figured specimen: 400-1.1
Langford, 1963: p. 112, text-figs. 200–201
No locality information.
- “Elonichthys” peltigerus** Newberry, 1856
Figured specimen: 400-1.3
Langford, 1963: p. 114, text-figs. 204–205
No locality information.
- Helminthochiton concinnus** Richardson, 1956b
Holotype: 3000-1.1 (copper replica = FMNH PE
6681)

- Richardson, 1956b: p. 62, text-figs. 34–36, meas.
No locality information.
- Holotype**
Smith, 1960: p. 1–48, text-fig. 33.1a–c
- Holotype**
Langford, 1963: p. 10, text-figs. 1–3
Both halves of concretion.
- McLuckiepter on luciae** Richardson, 1956a
Holotype: unnumbered (plaster cast = FMNH unnumbered)
Richardson, 1956a: p. 20, text-figs. 4–5, meas.
No locality information.
- Holotype**
Richardson, 1956a: p. 93, text-fig. 159
Two halves of concretion.
- Ootarb us pulcher** Petrunkevitch, 1945
Figured specimen: unnumbered
Langford, 1963: p. 54, text-fig. 86
No locality information.
- Ootarb us pulcher** Petrunkevitch, 1945
Figured specimen: unnumbered
Langford, 1963: p. 54, text-fig. 87
No locality information.
- Ootarb us pulcher** Petrunkevitch, 1945
Figured specimen: 500–3.2
Langford, 1963: p. 54, text-fig. 88
No locality information.
- Sigillaria sp.**
Figured specimen: unnumbered
Langford, 1963: p. 183, text-fig. 771
No locality information.
